

Mind Over Matter - J. LeDoux

Mind over matter
That's something I'm trying to do
It's just a little physics
That keeps me apart from you
Mind over matter
That's something i'm trying to do
Breakdown space and time
And be together with you

I'm trying to will you here
Find you where ever you are
Locate your body or soul
Pull you in from afar

Are you still in my time
Or have you slipped away
Have you gone forwards or back
Lving in another day

Where o where might you be
Different continent or on the sea
In the air flying free
Or in a place heavenly

Wherever you are now
I'll use my mind to find
No amount of space and time
Can keep you from being mine

Mind over matter
That's something I'm trying to do
I guess it's only physics
That keeps me apart from you

Mind over matter
That's something I'm trying to do
Breakdown space and time
And be together with you
